

PRIMARY CARE TEEN TRIPLE P

WHAT IS PRIMARY CARE TEEN TRIPLE P?

A brief targeted intervention in a one-to-one format that assists parents to develop parenting plans to manage behavioral issues (e.g. rudeness, disrespect) and skill development issues (e.g. independent problem solving, dealing with strong emotions, positive communication). These focused consultations can be carried out by health professionals in the course of providing routine health care. Practitioners provide 3-4 sessions (15-30 minutes each) over a period of 4-6 weeks. Sessions can be done in person, over the phone, or as a combination of both. During the sessions, parents learn about what influences the development of teenage behavior problems and then develop an individualized parenting plan based on information sheets specifically targeting the parent's area of concern.

WHO IS IT FOR?

Parents or caregivers with a specific concern about their teenager's behavior and prefer one-to-one consultations. They are likely to benefit when their teenager's behavior problems are mild and uncomplicated by a high level of family stress. Parents receiving this intervention sometimes then choose to do a Group Teen Triple P course if problems persist.

WHAT IS COVERED IN SESSIONS WITH PARENTS?

Session 1: Assessment of the presenting problem

In this session, the practitioner conducts an initial interview, discusses options for intervention, and introduces parents to keeping track of their teenager's behavior.

Session 2: Developing a parenting plan

The practitioner provides the parent with feedback of assessment results, helps the parent identify influences on their teenager's behavior, and helps to set goals for change. Then the practitioner introduces a relevant tip sheet which offers ideas from which to develop an individualized parenting plan to target the parent's specific behavior concern.

Session 3: Review of implementation

In this session, the practitioner uses a self-regulatory feedback process to assist the parent to review their implementation of their parenting plan and to set goals for further refinement if needed. Behavioral rehearsal in this session is used when parents need to rehearse specific parenting techniques. Obstacles to the implementation of their plan are discussed and problem-solved.

Session 4: Follow up

In this session, the practitioner reviews progress toward specific goals, assists the parent to further refine their parenting plan if needed, and discusses ideas to maintain positive changes. If necessary, referral options are discussed.

HOW MUCH TIME IS NEEDED TO DELIVER THE INTERVENTION?

In addition to each session, the practitioner should allow time for preparing for the sessions and supervision. Please see the table below for an approximate delivery guideline time for each family.
